

# The TAN co

## SPRAY TANNING WAIVER

(to be used with the standard waiver)

Please read, understand and sign the following.

- Spray tanning is accomplished by application of a solution containing the active ingredient DHA (Dihydroxyacetone). DHA is considered to be safe and has been FDA approved for cosmetic use. The solution is sprayed on to the skin manually by a certified technician. This is a much more detailed, custom/hands-on method.
- You will enter a private room where you will remove your clothing. What you wear for the session is up to you and your level of comfort. You should wear a dark swimsuit or underwear. The solution will wash out of clothing; it is best to wash the swimsuit or clothing worn as soon as possible after your session.
- You will then be sprayed. This process will take approximately ten (10) to fifteen (15) minutes. After spraying, you should wait until your skin is dry (approximately 5 minutes) before putting your clothes back on and you should not shower, bathe or sweat excessively for five (5) hours. The solution will give you an immediate bronzing effect. The bronzing effect is a result of a coloring additive in the solution that will remain on the skin until you are actually tan. When you bathe, the coloring will come off to reveal your actual tan beneath.
- **All people are different.** All ingredients in the product used in this procedure are intended for cosmetic use and generally regarded as safe. There are, however, occasions where individuals may be allergic to one or more ingredients in the spray tan solution.
- **Be advised there is a small percentage of people whose skin does not react favourably to spray tanning. For this reason, we do NOT advise being sprayed for the first time when your appearance is critical; e.g., wedding, special occasion, photographic session, modeling assignment, etc.**
- **Caution – Pregnant or nursing women should consult their physician before their session..**
- **Warning – The safety of this product has not been tested.**
- **Warning – This product does not contain a sunscreen and does not protect against sunburn. Repeated exposure of unprotected skin while tanning may increase the risk of skin aging, skin cancer and other harmful effects to the skin even if you do not burn.**

This Process has been explained to me and I hereby agree to allow an employee of the TAN co., to apply Spray Tan solution to my skin. To my knowledge, I have no medical condition or allergy which would preclude me from having this procedure done. I agree to hold the TAN co. harmless of any and all medical complications that may arise from exposure to the spray tan solution. I have been advised to discontinue use if any reaction occurs.

I also release the TAN Co. and their employees from any responsibility in the event I may not like the procedure. If I am not completely satisfied I will discuss the situation with the director of the facility and allow them to make arrangements for my satisfaction.

I have read and completely understand this consent form.
